

PATENT SEARCHES

HEALTH PROCEDURES, DRESSINGS, WOUND COVERS

Patent search October 2002, through March 2003 for time period of 1920 through 1977 revealed no such protective cover or dressing had received a patent now was under a patent.

There are many wound dressings marketed under company trademarks. None of dressings or bandages or covers for wounds, or vaccinations are similar nor do any resemble this cover. None of the marketed dressings or wound covers are specific for the cover or the protection of the smallpox vaccination site.
